

The following reflects our current written stance regarding the warranty of our products.

The mills we buy from all tell us that the frames have been “Windex” tested and approved for use.

“Precision Frameworks warrants frames for **Easy Frame, Classic Frame & Value Series** against manufacturer’s defects for up to one year from the purchase date to the original consumer of the product. Precision Frameworks will replace the defective frame with the same frame or a comparable frame up to the value of the original purchase. The frame must be installed following Precision Frameworks, LLC assembly and installation instructions.

Improper installation, harsh or abrasive cleaning products coming into contact with the frame, or excessive moisture coming into contact with the frame voids the warranty or any claim against it. Precision Frameworks, LLC reserves the right to inspect any claim prior to issuing credit.

The scope of the warranty is limited to replacing the product and does not include labor to install, to repair, or to remove the existing frame.”

Sincerely,

Jacob Williams, Manager  
Precision Frameworks, LLC
